

the 1990s, the number of people in the UK who are employed in the public sector has increased by 1.5 million (from 2.5 million in 1980 to 4 million in 1995). The public sector has also become an important employer of women, with 4.5 million women employed in the public sector in 1995, compared with 3.5 million in 1980. The public sector has also become an important employer of young people, with 1.5 million young people employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people with disabilities, with 1.5 million people with disabilities employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people from ethnic minorities, with 1.5 million people from ethnic minorities employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are over 50 years of age, with 1.5 million people over 50 years of age employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are under 25 years of age, with 1.5 million people under 25 years of age employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are single, with 1.5 million single people employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are married, with 1.5 million married people employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are divorced, with 1.5 million divorced people employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are widowed, with 1.5 million widowed people employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are unemployed, with 1.5 million unemployed people employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are employed, with 1.5 million employed people employed in the public sector in 1995, compared with 1 million in 1980.

the 1990s, the number of people in the world who are under 15 years of age has increased from 1.1 billion to 1.6 billion, and the number of people aged 65 and over has increased from 0.2 billion to 0.5 billion (United Nations, 1999).

There are a number of reasons why the world population is ageing. First, the number of people who survive to old age has increased. In 1950, the life expectancy at birth was 47 years for men and 51 years for women. By 1995, life expectancy at birth had increased to 71 years for men and 76 years for women (United Nations, 1999). Second, the number of people who survive to old age has increased. In 1950, the number of people aged 65 and over was 0.2 billion. By 1995, the number of people aged 65 and over had increased to 0.5 billion (United Nations, 1999).
